

**We're going to Mt. Ashland!**  
**When: February 27<sup>th</sup>, 2020**  
**Time: 7:30am to 5:00pm**

*Students will need to arrange transportation to and from school.  
 The regular school bus will not arrive at school on time to catch the field trip bus.*

On Thursday, February 27<sup>th</sup>, Team 7-3 is headed up for a fantastic day at Mount Ashland! Snow survival, winter wildlife, and mountain math measurement lessons will take place in the morning — in the snow! Then your child can take part in either skiing or snowboarding for the remainder of the afternoon. This is a wonderful and less-expensive opportunity for beginning skier/snowboarders – and a great opportunity to explore parts of the mountain that are inaccessible during the after-school ski/snowboard program.

Please Read Carefully Before Signing**

1. "I accept for use, as is, the equipment listed on this form, and accept full responsibility for the care of the equipment while it is in my possession. I will be responsible for the replacement at full retail value of any equipment rented under this agreement unless the equipment is returned to Mt. Ashland Rental by time agreed to above. ## Skier Type Descriptions

### Skier Type I

"Cautious skiing at lighter release/retention settings." Skis conservatively. Prefers slower speeds. Prefers easy, moderate slopes. Favors lower than average release/retention settings. (This corresponds to an increased risk of inadvertent binding release in order to gain increased releaseability in a fall.) Type I settings apply to entry level skiers uncertain of their classification.

### Skier Type II

"Moderate skiing at average release/retention settings." Ski Moderately. Prefers a variety of speeds. Skis on varied terrain, including most difficult trails. Are all skiers who do not meet **all** the descriptions of either Type I or Type III.

### Skier Type III

"Aggressive skiing at higher release/retention settings." Skis aggressively. Normally skis at high speeds. Prefers steeper and more challenging terrain. Favors higher than average release/retention settings. (This corresponds to decreased releaseability in a fall in order to gain a decreased risk of inadvertent binding release.)

-----Official use only below this line-----

My initials below signify that I have been instructed on the use of my equipment and have verified that the binding settings indicated below are those appearing on the binding. ....
